NexaTech Solutions Pvt. Ltd.

Company Profile & Employee Handbook — Sample Data

Company Overview

NexaTech Solutions is a fictional technology company founded in 2018 and headquartered in Pune, India. It develops cloud software, AI-powered business applications, and data analytics solutions for small and medium-sized businesses.

Company Details

Industry: Software & Artificial Intelligence
Headquarters: Pune, Maharashtra, India
Founded: 2018
Employees: 180
Working Model: Hybrid
Working Days: Monday to Friday

Departments

The company has six major departments: Engineering, Artificial Intelligence, Product, Sales & Marketing, Human Resources, and Finance. The AI department works on machine learning, NLP, computer vision, and generative AI applications.

Working Hours

Standard working hours are 9:30 AM to 6:30 PM, Monday through Friday, with a one-hour lunch break. Employees may work remotely up to three days per week with manager approval.

Leave Policy

Full-time employees receive 18 paid leave days per calendar year and 12 casual/sick leave days. Planned leave should normally be requested at least three working days in advance.

Technology Stack

Common technologies include Python, JavaScript, React, FastAPI, PostgreSQL, Docker, Git, cloud platforms, machine learning frameworks, vector databases, and large language model APIs.

AI Projects

The AI department focuses on an AI customer-support assistant, a document intelligence platform, and a predictive sales analytics system. The document intelligence platform uses document processing, embeddings, retrieval, and large language models to answer questions from business documents.

Employee Benefits

Employees receive health insurance, technical learning resources, an annual performance review, and reimbursement for selected professional certifications.

Security Policy

Employees must use approved accounts and devices for confidential information. Passwords and API keys must never be shared through public repositories. Confidential documents must not be uploaded to unauthorized external services.
